

MOST DISTINGUISHED DEVELOPING CAREER ACHIEVEMENT AWARD

Awarded by the Process Industries Division

Prize: £1,500 and a certificate

If you have graduated with a mechanical engineering or related degree in the past 10 years and since graduation have been developing a career in process mechanical engineering science and technology, this is your opportunity to tell the engineering community in a big way your achievements and contributions which you take pride in.

In doing so, you have the chance to win £1,500 prize by entering the IMechE Process Industries Division's '**Most Distinguished Developing Career Achievement Award**'.

Complete and submit the **application form** on pages 4-5 and you could be on the road to becoming the winner of this prestigious award.

Act now and get your application in to make sure you do not miss the submission **deadline of 18 March 2019**, and respond to IMechE's commitment to supporting and nurturing the process industries future leaders through recognition and awards.

Managers please tell your colleagues about this prestigious award and encourage eligible candidates to apply, perhaps as a step to prepare the future leader of your organisation.

Please refer to the **guidance notes** on pages 2-3

Award Conditions:

- a. Award of the prize is the recognition of those developing graduates/engineers who have demonstrated innovative and responsible professional leadership, and the potential for future distinction and commitment to serving others.
- b. The award will look for achievements in innovative industrial research applications and/or in areas associated with management and/or professional practices in process industries.
- c. The monetary value of the Prize is: £1,500 max.

Judging panel of senior engineering professionals, managers and executives from the process industry will look for your passion in mechanical engineering science and technology, your overall ability in the pursuit of excellence as well as your academic achievements and contributions in your professional practices.

Enquiries: E ge@imeche.org.

GUIDANCE NOTES
MOST DISTINGUISHED DEVELOPING CAREER
ACHIEVEMENT AWARD
Process Industries Division

Please observe the following guideline and requirements before submitting your application.

KEY STAGES AND DEADLINES:

- Completed application form submission deadline – 18 March 2019 to ge@imeche.org

The IMechE Process Industries Division 'Most Distinguished Developing Career Achievement Award' is designed to recognise and reward those developing engineers who have demonstrated innovative and responsible professional leadership, and the potential for future distinction and commitment to serving others.

The Award looks for developing engineers who have graduated from an IMechE accredited or related engineering first degree course, or MSc postgraduate course within the past 10 years. They must be in post graduate work position since graduation, exercising their learning at university in their work place and at the same time developing themselves in a substantial and responsible manner professionally and technically.

Evidence by way of achievements in innovative industrial research applications and/or in areas associated with management and/or professional practices in the science and/or application of mechanical engineering in the process industries is required to support the application.

Application does not require your company approval. However IMechE needs to be granted the right of citing any application materials which may have a bearing on intellectual property right.

Applicants will be requested to highlight their academic, work and any other achievements. Evidence to demonstrate these achievements are required for supporting the application.

Applicants will be assessed on, in addition to academic and work related achievements, their overall ability for future distinction and also their commitment to serving others.

Winners will be invited to an awards ceremony at IMechE HQ, One Birdcage Walk, London, SW1H 9JJ.

All candidates will receive a certificate. The winner will receive a certificate and £1,500 prize money.

The judges' decisions are final and no correspondence should be sent to any judges. IMechE also reserves the right of not awarding any prizes at anytime at its discretion.

For further details, or enquiries about the awards scheme, please contact:

APPLICATION FORM

Most Distinguished Developing Career Achievement Award

1. Personal details

Full name of applicant:

Gender:

Age:

Contact Address:

City/Town:

Postcode:

Day time contact number:

Mobile phone number:

Email Address:

2. Employer's details

Company name:

Address 1:

Address 2:

City/Town:

Post Code:

3. University details

University details: *Name and address of university or college attended*

Course title:

Title and class of degree:

Degree completion date: *month/year*

***4. Please list relevant academic achievements and additional interests at university (please provide evidence for all claimed achievements)**

***5. Please list relevant achievements and interests at work (please provide evidence for all claimed achievements)**

Include summertime, gap year, post graduate employment, plus brief current job role description and responsibilities, and any technical innovations or problem solving successes which you are particularly proud of.

***6. Please list relevant achievements and interests in the social environment (please provide evidence for all claimed achievements)**

Include any form of key personal involvements and/or contributions that had led to an improved situation for other people, groups of individuals, a community and/or the society as a whole which you are particularly proud of.

***7. Please state, in no more than 50 words, why you chose to be a mechanical engineering professional in the process industry**

***8. Anything else you would wish us to know and form part of the assessment**

***9. Referee** (THREE required and they should be familiar with your past and present work and/or academic studies but not a relative to you)

Personal details: *Full name of referee*
